Publish your Rheology Letter in EPL

A leading international journal, EPL (*Europhysics Letters*) publishes Letters on cutting-edge research from across the whole of physics.

Run by scientists for scientists, each research area of EPL is overseen by leaders in the field, ensuring the journal's quality is constantly maintained and its direction and development is managed by experts.

A key focus area for EPL is Rheology, and the journal publishes Letters on all aspects of this field, including:

- Non-Newtonian Fluid Mechanics and Complex Flows
- Constitutive and Computational Modeling
- Interfacial Rheology, Micro-rheology and Microfluidics
- Colloids, Suspensions, Emulsions and Foams
- Biopolymers, Biofluids and Foods
- Polymers, Surfactants and Liquid Crystals
- Solids and Granular Materials

If you are working on research in any of these areas, the co-editors would be delighted to receive your submission. Articles should be submitted via the automated manuscript system at www.epletters.net.

Why publish a Letter with EPL?

There are many advantages that an author with EPL can benefit from, including:

High standards of peer review

Articles are usually sent to two reviewers selected by the EPL co-editors who are active research scientists in this field. In exceptional cases the co-editor may make a decision without external review.

Fast publication times

The average accept to online publication time for 2012 was 25 days.

Wide visibility

Your article will be free to read for 30 days following online publication.

International readership

Your article will be read in more than 90 countries.

No page charges

We won't charge you page or article fees for the publication of your work.

Do you want to know more?

If you have any questions about publishing in EPL, or about the journal in general please visit www.epljournal.org or e-mail us at info@epljournal.org.
